

Connect your voice services to the new world of Microsoft Teams

Call2Teams for Trunks is a global Cloud platform that connects SIP Trunks into Teams and can be configured by the customer in a few minutes.

Configuring and using Direct Routing for Microsoft Teams is seen by customers as complicated and expensive. With Call2Teams, customers can be up and running with their existing carrier in a few minutes, no hardware or software is needed. Customers now have an easy route to stay with their current provider as they move from a traditional phone service or PBX, to using Microsoft Teams' built-in Phone System capability.

What is Call2Teams for Trunks

Call2Teams will connect existing phone lines, numbers and call bundles to a Customer's Microsoft Teams users without any disruption. It's a cloud service that runs in Microsoft Azure and includes a revolutionary set-up process that has automated several days planning, configuration and deployment into a single button click. You can quickly offer a new service to customers who are using Microsoft Teams; Call2Teams opens a new market opportunity to leveraging current PSTN and SIP Trunk expertise.
